

Stains

CR-Stains transform ordinary gray slabs into extraordinary surfaces that are both beautiful and lasting. Using the natural shades of concrete, stains enhance the natural feel of concrete while providing lively colors and varying shades of highs and lows. Additionally, layers of darker colors can be applied on top of lighter colors, providing unique blending and shades that add depth and variation to your floors. With CR-Stains, we have the ability to create borders, scoring patterns and unique tones that provide a customized flooring solution.

What separates CR-Stains from other similar products? It's simple - our experience and artistic detail. With nearly a decade of experience, we have performed hundreds of solutions, both complex and simple. Keefe has dealt with various concrete foundations, both good and bad, and has the experience to deal with the most complicated situations, providing our clients with practical and desirable solutions. Additionally, his artistic eye allows our clients to explore options that transform basic stains into decorative pieces of art.

CR-Stains provides the confidence and proven results that consistently meet the quality expectations of our team and trusted clients.
